

AUTOMOTIVE INDUSTRY

## BOXES FROM CORRUGATED OR BUBBLE SHEET POLYPROPYLENE

We produce transportation and storage packaging for the automotive industry. If you are looking for a proven and experienced producer of packaging, then Interobal will be the right partner for you. We have a wide range of production technologies and many years of experience in the field.

## PACKAGING

- A** AUTOMOTIVE INDUSTRY
- E** ELECTRICAL ENGINEERING INDUSTRY
- K** METALWORKING
- M** MEDICAL EQUIPMENT
- S** STANDARD TRANSPORTATION PACKAGING
- T** TECHNICAL PARTS

# AUTOMOTIVE INDUSTRY

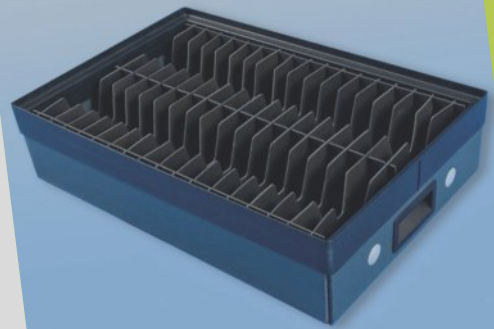

## Boxes from corrugated or bubble sheet polypropylene

These boxes are a suitable solution for customers with special requirements on returnable packaging. The advantage of polypropylene boxes, as compared to injection moulded ones (e.g. KLT), is the possibility to produce just a single piece in the exact size and design required by the customer. The boxes are also light and sufficiently stable.

These boxes can be delivered as a version with stacking corners or a full stacking rim. The type of handles, label holders and other elements and their quantities can again be supplied according to the customer's needs. The boxes can be delivered empty or with internal PE, PP, PU and textile fixtures.

Very sensitive parts can be packed in boxes with internal fixtures made from cross-linked PE foams with a very fine structure or by using textile fixation (grid). Less sensitive parts can be packed in fixtures made from non cross-linked PE foam, PUR or a grid made from corrugated PP. Fixtures are always designed to comply with requirements for maximum protection, number of stored parts and good ergonomics during loading and unloading.

Boxes and their inlays can be supplied in electrostatically dissipating (EDS) versions, to comply with customer requirements on the protection of parts from electrostatic charges.

**INTEROBAL®**

LEADING PRODUCER OF TRANSPORTATION AND STORAGE PACKAGING

### Production range

- Constructive packaging
- Transportation and storage packaging
- Processing corrugated polypropylene
- Plastic and aluminium cases with inlays
- Technical parts and seals
- Production of profiled PU elements
- Storage packaging with non-woven textiles

### Development

- Our own development centre
- Comprehensive packaging solutions
- Production of prototypes
- Bespoke packaging solutions
- Testing and transportation tests
