AUTOMOTIVE INDUSTRY

Transport and storage boxes

These boxes are a suitable solution for packing mostly larger and heavier parts, while reducing packaging volume during return shipments. The boxes can also be delivered empty or with internal PE, PP and textile fixtures. Fixture are always designed to comply with requirements for maximum protection, number of stored parts and good ergonomics during loading and unloading. It is the suitably selected fixture design that will guarantee the long-term protection of parts, when transported to their receiver.

Collapsible transportation boxes are available from a basic layout of 800 x 600 mm in all sizes up to maximum dimensions of 1600 x 1200 mm.

Their advantage is their high dynamic and static load-bearing capacity and the minimum amount of space they occupy in their collapsed state.

INTEROBAL®

LEADING PRODUCER OF TRANSPORTATION AND STORAGE PACKAGING

Production range

- Constructive packaging
- Transportation and storage packaging
- Processing corrugated polypropylene
- Plastic and aluminium cases with inlays
- Technical parts and seals
- Production of profiled PU elements
- Storage packaging with non-woven textiles

Development

- Our own development centre
- Comprehensive packaging solutions
- Production of prototypes
- Bespoke packaging solutions
- Testing and transportation tests
