AUTOMOTIVE INDUSTRY

EPP transportation boxes

This type of returnable packaging is especially suitable for sensitive parts with complex shapes or parts with higher weight, while requiring a long lifetime and high packaging resistance against the elements. Because of the high costs for developing and producing necessary foam moulds, it is more suitable for high volume and long-term projects.

EPP transportation boxes can be combined with PE / PP fixtures

The properties of expanded polypropylene (EPP) predetermines it for packaging very sensitive products.

This is a shapeable material consisting from 95% of air and 5 % from polypropylene.

EPP is excellent for absorbing repeated impacts, it is light, strong, has a good shape memory and is resistant to water and usual chemicals.

This material is resistant to high temperatures and thanks to its easy recyclability, it is also eco-friendly.

INTEROBAL®

LEADING PRODUCER OF TRANSPORTATION AND STORAGE PACKAGING

Production range

- Constructive packaging
- Transportation and storage packaging
- Processing corrugated polypropylene
- Plastic and aluminium cases with inlays
- Technical parts and seals
- Production of profiled PU elements
- Storage packaging with non-woven textiles

Development

- Our own development centre
- Comprehensive packaging solutions
- Production of prototypes
- Bespoke packaging solutions
- Testing and transportation tests
