

AUTOMOTIVE INDUSTRY

PE AND PP DIVIDERS

We produce transportation and storage packaging for the automotive industry. If you are looking for a proven and experienced producer of packaging, then Interobal will be the right partner for you. We have a wide range of production technologies and many years of experience in the field.

PACKAGING

- A** AUTOMOTIVE INDUSTRY
- E** ELECTRICAL ENGINEERING INDUSTRY
- K** METALWORKING
- M** MEDICAL EQUIPMENT
- S** STANDARD TRANSPORTATION PACKAGING
- T** TECHNICAL PARTS

AUTOMOTIVE INDUSTRY

PE and PP dividers

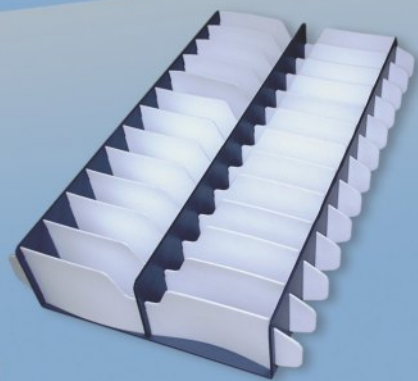

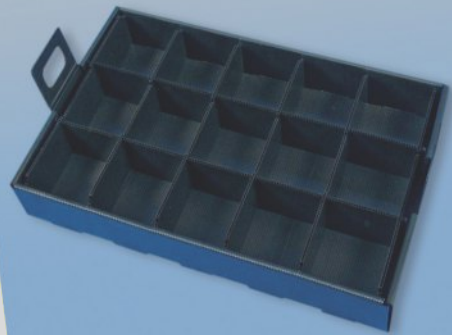

Used everywhere, where it is necessary to separate individual parts from each other and prevent their mutual contact. This mostly involves various types of grids made from PE, but also PP or a combination of both of these materials.

Dividers from corrugated PP can be delivered in various colour designs, thickness and volumetric weight.

PE dividers provide protection to surface finished parts during transport and handling. These dividers can be exactly adjusted to the size of the packaged part. They provide very good protection against impacts and vibrations.

As protection against electrostatic charges, it is possible to supply all types of PE and PP dividers in ESD versions.

Other interesting options are attachable PE dividers for corners, in disposable versions or versions for repeated use.

LEADING PRODUCER OF TRANSPORTATION AND STORAGE PACKAGING

Production range

- Constructive packaging
- Transportation and storage packaging
- Processing corrugated polypropylene
- Plastic and aluminium cases with inlays
- Technical parts and seals
- Production of profiled PU elements
- Storage packaging with non-woven textiles

Development

- Our own development centre
- Comprehensive packaging solutions
- Production of prototypes
- Bespoke packaging solutions
- Testing and transportation tests
